## Dana Delivers Strong Portfolio of Ford Ranger Parts to the Aftermarket

With the addition of recently published Spicer<sup>®</sup> parts to DanaAftermarket.com, Dana is now equipped to provide aftermarket driveline parts to approximately 70 percent of Ford Rangers in Europe and the U.S. This comprehensive coverage includes Ford Rangers manufactured from 1987 until now, with an even greater number of components available for the latest generation in the Ford Ranger series.

“We are constantly assessing the OE technologies we supply across the globe – especially on popular vehicle platforms like the Ford Ranger – and place a strong emphasis on matching that coverage the best we can in the aftermarket,” said Guido Reiter, driveshaft product manager, Dana Incorporated Aftermarket Group. “We have an unwavering commitment to excellence for all our products and are pleased with the exceptional amount of OE-quality driveline technologies we’re able to offer many Ranger owners.”

Dana’s driveline components – including driveshafts, axles, center bearings, u-joints, and more – are designed to meet the highest quality OE specifications, and are engineered for peak performance and durability. As an added bonus to Dana’s robust Ranger product offerings, owners of the Mazda BT-50, which has the same driveline platform as the Ranger, can use the same reliable replacement parts. To place an order or learn more about the Spicer parts available for Ford Rangers via Dana’s distribution center in Győr, Hungary, visit [DanaAftermarket.com](http://DanaAftermarket.com).
