Dana's Aftermarket Group is Expanding its Product Portfolio, Completing Driveshaft Product Range for Scania Commercial Vehicles

Dana's Aftermarket Group is expanding its product portfolio for Scania commercial vehicles to feature a complete range of approximately 1,100 driveshafts. With the additions, original Spicer® driveshafts and driveshaft components will be available for every Scania model currently in production with a short lead time and service virtually all of Scania's vehicle needs. The product line now covers the complete range of driveshafts including: Scania P300, P400, P420, P500, P520 and P600.

Dana has a long history of supplying Spicer® driveshafts for Scania as an original equipment manufacturer. Dana's capabilities and processes have enabled the delivery of a complete package of specially designed and manufactured original Spicer components, including u-joints, tubes, and more for Scania.

"This complete range of products showcases Dana's capabilities and processes, and with a team of talented engineers, we are pleased to deliver a complete package of specially designed and manufactured original Spicer® components for Scania," said Guido Reiter, driveshaft product manager, Dana Aftermarket Group.

The Spicer® driveshaft product portfolio for Scania Trucks can now be easily accessed online through the Spicer® web catalog. The last update included all searchable cross-references for the new Scania driveshaft range. After introducing the expanded product range in 2016-17,
